CooLifting

THE BEAUTY GUN

TIMELESS BEAUTY

THE CONCEPT

The Coolifting gun shoots on the facial tissues a powerful CO² flow at a very low temperature and a high pressure, combined with an extremely high concentration of atomized actives. It is the most spectacular and fast treatment ever seen to challenge passing time.

THE APPLICATION

The combination of the cold CO² flow at a high pressure and the atomized actives cause:

PARADOXICAL VESSEL-MOTRICITY

Vasoconstriction followed by a vasodilatation of the blood microcirculation. When suffering an intense cold stimulus, the vessels contract and expand.

CRYOPHORESIS AND BAROPHORESIS

The combination of cold with the high pressure applied on the dermis causes an intense penetration of the Coolifting actives and an exponential increase of their effects.

CRYO-CARBOXYTHERAPY

The CO² flow at a very low temperature and at a high pressure activates the blood microcirculation; it induces collagen and elastine formation and increases the tissues' oxygenating.

THERMAL SHOCK

Stimulation of the underlying tissues. Those tissues are normally at a temperature of some 36°C (97°F). The Coolifting extreme and sudden cold causes a deep and instantaneous dermis reaction.

THE RESULTS

The Coolifting treatment generates an immediate effect (lifting) smoothing the skin, eliminating superficial wrinkles and reducing deep wrinkles, followed by a lasting rejuvenating effect.

TREATMENTS

COOLIFTING

Product for an antiaging and luminosity effect. Contains hyaluronic acid and tighteners. Indicated for all skin types. It is designed to easily and quickly treat the entire face to achieve a general lifting effect that smoothes and illuminates the skin, with special attention to the areas most punished by wrinkles both expression and gravitational: eye contour, forehead, eyebrows, cheeks and labial area.

COOLCLEAR

Adds a clearing effect to the antiaging one and unifies skin tone. Especially indicated for skins with pigmentation differences. Kojic Acid, Glycolic Acid and Vitamin C have been added to the original composition.

COOLCELL

Conceived for an optimal and powerful anti-cellulite treatment. Formulated with 3 special active ingredients with anti-cellulite properties (glucine, caffeine and carnitine) and supplemented with natural extracts that help in the process of eliminating localized fat. It also includes a 50 ml Gel Cream conceived for a maintenance of shock treatment. Thanks to its formulation with balanced concentrations, we achieve an optimal effect for the subsequent treatment and maintenance at home in the process of elimination and draining of localized fat and retained liquids.

CREAMS FOR HOME USE

COOLIFTING Daily Gel Cream

Moisturizing Gel Cream with an immediate firming effect. High hyaluronic acid content, it provides both skin moisturization and smooths out wrinkles, and several active ingredients combine to produce a skin lifting effect, stretching it and thus, helping to hide those tough wrinkle lines.

COOLCELL Anti-cellulite Gel Cream

Anti-cellulite cream-gel for daily application by massaging the area to treat (morning and evening) that visibly firms, lifts and streamlines reducing the appearance of cellulite. Powered by caffeine, glucine and carnitine.
